CONTENTS

<i>Preface</i>	v
<i>List of Contributors</i>	vii
1. Biodiversity of Vegetable Crops: An Overview <i>D. K. Singh and H. Choudhary</i>	1
2. Germplasm Utilization in Vegetable Improvement <i>Umesh Srivastava</i>	14
3. Concept and Applications of Core Collections in the Efficient Management of Plant Genetic Resources <i>S. K. Mishra and I. S. Bisht</i>	42
4. Plant Genetic Resources Management in Vegetable Crops <i>Hari Har Ram and D.K. Singh</i>	53
5. Collection, Characterization and Conservation of Indigenous Germplasm of Vegetable Crops <i>S. K. Mishra, Ashok Kumar, S. K. Yadav and K. K. Gangopadhyay</i>	61
6. <i>In - Situ</i> Conservation Approach for Germplasm of Vegetable Crops <i>S. K. Verma, K. S. Negi and K. C. Muneem</i>	73
7. Molecular Markers and Genetic Resource Management of Vegetable Crops <i>H. Choudhary and D. K. Singh</i>	86
8. Intellectual Property Rights in Relation to Germplasm Management <i>H.S. Chawla</i>	109
9. Impact of Genetic Modified Crops on Biodiversity and Environment: Biosafety Issues and Regulation <i>Anil Kumar and Sonu Ambwani</i>	116
10. Role of Bioinformatics in Crop Diversity Analysis <i>Soma Marla</i>	131
11. Application of Cell and Tissue Culture Techniques for Plant Genetic Resources Management <i>H.S. Chawla</i>	136

12. Exploitation of Germplasm for Okra Improvement in India <i>N.C. Gautam</i>	143
13. Genetic Diversity of Indigenous Underutilized Cucurbits <i>S.K. Verma, K.S. Negi, K.C. Muneem and R.R. Arya</i>	152
14. Genetic Resources of Vegetable Crops of North Eastern Himalayan Region <i>R.K. Yadav, H. Choudhary, S.K. Sanwal and D.K. Singh</i>	172
15. Leafy Vegetables : Genetic Resources and Improvement <i>K.K. Gangopadhyay, Gunjeet Kumar and S.K. Yadav</i>	186
16. Genetic Resources for Cowpea Breeding <i>B.B. Singh</i>	198
17. Genetic Resources for Cole Crops improvement <i>S. R. Sharma and Chander Parkash</i>	225
18. Management of Parthenocarpic Genotypes of Cucumber <i>D.K. Singh and H. Choudhary</i>	243
19. Breeding Potential of Indigenous Germplasm of Cucurbits <i>D. K. Singh</i>	250
20. Plant Genetic Resource Management of Tomato <i>D.K. Singh and H.Choudhary</i>	266
21. Breeding Approaches for Utilization of Wild Species in the Improvement of Vegetable Crops <i>H. Choudhary and D.K. Singh</i>	275
22. Biochemical Characterization of Indigenous Genetic Resources of Vegetable Crops <i>A.K. Gaur and D. Khokhar</i>	291
23. Role of Gene Bank in Plant Genetic Resource (PGR) Management of Vegetable Crops <i>K.S. Negi, K.C. Muneem, S.K. Verma, A.S. Rana and P.S. Mehta</i>	298
24. Biometrical Approaches for Diversity in Vegetable Crops <i>D. Roy</i>	317
25. Management of Genetic Resources of Vegetable Crops Using Geographical Information System <i>Rajeew Kumar and H. Choudhary</i>	325
26. Harvesting the Potential of Indigenous Genetic Resources for Improvement of Brinjal <i>A.S. Sidhu</i>	333
27. Indigenous Genetic Resources of Underutilized Vegetable Crops <i>K. V. Peter, P.G. Sadhan Kumar and S. Nirmala Devi</i>	339

28. Genetic Resources for Pea Improvement	346
<i>Y. V. Singh, Shri Dhar and K.B. Bhushen</i>	
29. Genetic Resource for Improvement of Radish	358
<i>N. Ahmed, A. J. Gupta and K. Hussain</i>	
30. Genetic Resource Potential for Turnip Improvement	374
<i>N. Ahmed, H. Choudhary, A. J. Gupta and K. Hussain</i>	
31. Genetic Resource Potential for Carrot Improvement	389
<i>N. Ahmed, H. Choudhary, A. J. Gupta and K. Hussain</i>	
32. Marker Assisted Selection (MAS) for Genetic Improvement in Cucurbitaceous Vegetables	402
<i>T.K. Behera</i>	
33. Exploitation of Indigenous Genetic Resources for Chilli Improvement	411
<i>Durvesh Kumar Singh</i>	
34. Genetic Resources for Potato Improvement in India	439
<i>Dhirendra Singh and K.P. Singh</i>	
35. Breeding Potential of Indigenous Germplasm of Seed Spices Crops	454
<i>S.K. Malhotra</i>	
36. Biodiversity and Utilization of Medicinal Mushrooms with Particular Reference to <i>Ganoderma lucidum</i> and <i>Cordyceps sinensis</i>	475
<i>R.P. Singh and K.K. Mishra</i>	

Vegetable Crops

Genetic Resources and Improvements

Plant genetic resources comprising of reservoir of gene and gene complex are basic raw materials for genetic improvement of any crop including vegetables.

The book entitled “Vegetable Crops: Genetic Resources and Improvement” is a compilation of information generated through research work of many scientists in India and abroad from reputed institutes like, IIHR, IARI, GBUAT, TNAU, IIVR, CCSHAU, PAU, MPUAT, CSKKVV, BCKV etc..

The book contains introductory chapter on various aspects of collection, characterization, conservation and utilization of germplasm in genetic improvement of different vegetable crops highlighting the importance of genetic resource management and their achievement in India. Application of different biotechnological tools and techniques like, tissue culture, molecular markers and bioinformatics in conservation and utilization of plant genetic resources have been included. The issues related to biosafety regulations and IPR have also been discussed.

Genetic improvement of different vegetable crops through utilization of genetic resources have been dealt in chapters covering all important vegetables including underutilized vegetables, seed spices and edible mushrooms.

This book is very helpful to the teachers, scientists, students and personals involved in PGR management, who wish to update the knowledge on recent technological advances in genetic resource management and improvement of vegetable crops.

2012, xiv + 582,fig., tabs., 25 cm
